

Bill-Rite Advantages

- Bill-Rite loads electronic bills (e-Bills) from all major Telecom suppliers.
- Bill-Rite processes an e-Bill by comparing each billing record against the asset and contract information contained in TMI Telebase.
- Once the processing is complete Bill-Rite provides validation reports detailing all billing errors contained in the e-Bill.

Validate Every Bill – Every Item

- This application makes TMI unique in the Canadian marketplace because we are the only company in Canada who validate every line on your supplier's e-bill.
- Validation reports detailing all billing errors are available to the client as soon as the processing is complete.
- Bill-Rite also assists clients in their cost allocation process by identifying the correct amount to be posted to their financial system, along with the associated recoverable or payable amount as a result of the billing error.

What are the Benefits?

- Industry experts indicate potential **5 -15% savings** to your bottom line as a result of billing errors.
 - Insure you're **paying correct rates** and only **paying for assets** you're really using.
- Savings in time and money by **discovering billing errors** early before they accrue to large amounts.
 - Ability to allocate the **correct amounts to cost centres** when billing errors occur.
